## Joint Sealant Diamond Cutter Blade - for Concrete & Masonry Control Joints

Slices Joint Sealant from Concrete and Masonry Control Joints ~ *FAST!*

### SLICES

Typical diamond crystals wear or round-over . . .

Cutter Blades has extremely hard diamond chips that retain their sharpness to slice through sealant instead of grinding it.

Hard Diamond Chip, Stellite® Alloy  
6000 RPM setting  
*eliminates* friction heat build-up.

### Slices Hard or Soft Soft Joint Sealant from Control Joints

**Joint Sealant Cutters**

For use on *variable speed*  
**Hand-Held Angle grinders**  
(6,000 Rpm setting).

2 for 1:  
Joint sealant material sliced  
from the control joint . . .

Hard Cutters lightly scrapes the  
joint's inside edge . . .

Provides a clean edge  
for re-sealing . . .

**All in One Step.**

### Slices Hard Polyurea or Soft Urethane Joint Sealant

Extremely Hard & Solid Diamond Chip Maintains its Sharp Cutting Edge - Keeping the blade from Melting Sealant -

**Warning:** As effective as the Diamond Cutter is at slicing through the joint sealant material, there are limitations: The hardness of the diamond chip will cause them to shatter if they directly hit into concrete - they are not designed to cut concrete. Pay close attention and maintain a steady "straight" line cut along the inside edge of the expansion joint to ensure long blade life. Additionally, Cutter blades are only to be used in expansion joints that are open-ended or filled with backer rod (foam) - do not use Cutter Blades if concrete or mortar is directly beneath the sealant material for it will also fracture the extremely harden diamond chip.

PCB's (Polychlorinated Biphenyls). PCB's are carcinogenic chemicals that are found in certain caulking and joint sealant compounds. Using a Diamond Stellite® Cutter Blade with the Dust Director™ is a proven, effective and fast way of removing PCB Joint Sealant. As the joint sealant is sliced away, the Dust Director captures the debris - and any airborne particulates - and *directs* them into a HEPA efficiency vacuum cleaner. Workers are productive with the blade visibility of the Dust Director and both the workers and the environment are kept clean and safe.

ITEM NO		SIZE	PRICE / EA	
			Ea	Box (10/Bx)
DJ4508C		4.5" x .080 x 7/8"	\$110.00	\$98.00
DJ6009C		6" x .095 x 7/8-5/8"	\$180.00	\$155.00
DJ7009U		7" x .095 x 7/8-5/8"	\$200.00	\$175.00
DJ1211E		12" x .110 x 1"/20MM	\$390.00	\$360.00
